

## SI360 Release & Revision Notes

### V1217

SILAN 600 - Delete item jumped to the top

SILAN 597 - Alert the user when the tablet goes offline.

SILAN 601 - Message to kitchen jumps to seat 1. Needs to be on the item.

SILAN 608 - BUG: Message to Kitchen - Indent the item for selected modifier

SILAN 613 - Message to kitchen must start with exclamation mark

SILAN 602 - Make item mod red in the guest check UI.

SILAN 611 - BUG: Sequence of item in SI360 is not the same as FPOS items

SILAN 612 - BUG: On seat one hit course 1 and a food item, then course 2 and a food item, and you will see that the guest check gets to see ones, two seat 2s

Bug #1 – Change PIN blows red error message.

Bug #2 – System setting to use Employee ID not working. IOW, every employee ID in Employee Maintenance with Front End Privileges should be able to Sign On with employee ID only.

Bug #3 – When wrong PIN is entered, not User Error message appears.

Bug #4 – Keyboard UI after clicking Message to the Kitchen not functioning well. Big delays, slow.

Bug #5 – With Item selected, message modifier from Keyboard ends up at bottom of Seat #, not after the item selected.

Bug #6 – When depressing a button on UI, the button action should depress and bounce, up and down. Not stay depressed with contrast color that is hard to read.

Bug #7 – Msg to Kitchen didn't print in red.

## V1223

SILAN-619: BUG: Keyboard UI after clicking Message to the Kitchen not functioning well. Big delays, slow.

SILAN-620: BUG: With Item selected, message modifier from Keyboard ends up at bottom of Seat #, not after the item selected.
